

## Yuri Valentinovich Gotovskiy

Graduate of the radio-technical faculty of the Moscow Energy Institute. Professor, research interests: Radio engineering and medicine.

Author of several monographs, numerous publications, owner of copyrights and patents.

Founder and director of the Center for Intellectual Medical Systems "IMEDIS".

Gotovsky J.V. created a new discipline in medicine – "Computer-aided energetic-informative methods of diagnostics and therapy". A field which combines electroacupuncture diagnostics and bioresonance therapy.

The peculiarity of Yuri Valentinovich's talent is shown not only in solving technical problems in the development of equipment, but also in the creation of the school for training specialists in the methods of electrodiagnostics and bioresonance therapy, which is successfully functioning even today.

Organizer and inspirer of the annual international conference "Theoretical and clinical aspects of the application of bioresonance and multiresonance therapy."

Before the 70th anniversary of Yuri Valentinovich, his friends and colleagues share their memories.
